

# Anti-theft hidden System

## Greatest discretion with the highest quality

Theft control and providing a pleasant shopping experience all at once is a daily challenge that all our customers face as retailers expand into new markets.

Prosistel Systems meets new retailers' requirements through its new antitheft products in items electronic surveillance for those retailers who are aware of their clients' value. Prosistel Systems manufactures and exports its products to many countries around the world without losing its brand image and achieving an international recognition through its products quality and continuous technological advances in the field of R&D.

The invisible Ultra Door Loop 2.0 Acousto Magnetic System PANEL is equipped with the latest technology and able to cover up to a 2 meters distance with DR label and up to a 3,60 meters distance between antennas. Through its invisible design and at the same time discreet, it blends with a whole range of environments in different stores.

The system will warn us by means of a sound and visual alarm integrated into the security antennas informing the store personnel of the theft attempts. The antenna provides a sound alarm through a piezoelectric alarm and the visual warning through red LED light located on the top of the antennas.

This system offers the additional advantage of identifying suspected robbers in long distance before they would access to the store through an innovative signal processing technology without antennas.

It can be installed in almost all types of entrance doors either with pre-installation (the system will be hidden and completely invisible) or through thin and discreet tubes around the door frame.

## Product Specifications

### Electrical Characteristics

#### Power Supply

Main entrance: 110-120 V CA o 220-240 V CA a 50-60 Hz  
 Main input fuse:..... 1 A, 250 V (5 x 20 mm)  
 Main power fuse..... 2 A, 250 V (5 x 20 mm)  
 Low Fuse..... 1 A, 250 V (5 x 20 mm)  
 Current Power ..... 0,4 A a 220 V CA  
 Input Power: ..... 44 W

#### Transmitter

Operating Frequency .....58 kHz (± 400 Hz)  
 Rate Pulses trasmission: ..... 1,5 mSeg

#### Receiver

Center Frequency .....58 kHz

#### Alarma

Sound level..... 95 dBA

#### Measures CONTROL UNIT ANT AUX

Height.....	30 cm	.....	25 cm
Width.....	20 cm	.....	10 cm
Depth	6 cm	.....	3,2 cm

#### Detection Range

Hard Tag Rambo (Prosistel).....360 cm  
 Hard Tag Flat Pencil (Prosistel).....280 cm  
 Optitag (Prosistel).....200 cm  
 Label DR (Prosistel): ..... 200 cm

### Advantages in using PROSISTEL SYSTEMS

It deters professional thieves  
 The investment could be capitalized after a detection, protecting the store from thieves with more sophisticated techniques.

#### Modular Design

Stores can add the remote management "Module TCP IP" to their existing security system

The space store can be optimized

Stores can use a single ULTRA DOOR LOOP system without needing additional antennas, keeping free all the entrance door space.

#### Optional

- Close tags detection
- JAMMER detection
