

Sistemas de Deteccion antihurto EM3700 Sistema Electromagnetico

PRODUCT DESCRIPTION

Electromagnetic technology is perfect to protect books, gift items and cosmetics, as well as an elegant and modern design.

Through this type of technology is possible to activate and deactivate security tags, being perfect for libraries or video stores. Its discretion and small size make it really useful for perfumeries.

This system offers the additional advantage of identifying suspected robbers in long distance before they would access to the store through an innovative signal processing technology without antennas.

PROSISTEL SISTEMAS (Fabrica)

All our systems has digital electronics to filter occasional electrical interferences from electronic devices.

Product Specifications

Electrical Characteristics

Power Supply

Main entrance: 110-120 V CA o 220-240 V CA a 50-60 Hz
Main power Main power fuse..... 2 A, 250 V (5 x 20 mm)
Current Power:0,5 A a 220 V CA
Input Power: 57 W

Transmitter

Operating Frequency:280Hz (\pm 40 Hz)

Receiver

Center Frequency280 Hz

Alarm

Sound level..... 95 dBA

Measures CONTROL UNIT ANT AUX

Height.....	26 cm	146 cm
Width.....	32 cm	41 cm
Depth	7 cm	7,2 cm

Detection Range

Adhesive Tag 3 x 16 cm.....80-90 cm
